EDUCATION

VIVEKANANDA COLLEGE
B.Sc. in Computer Science
2024 -- 2027 | Tamil Nadu
Cum. CGPA: 8.1

COURSEWORK

UNDERGRADUATE
Data Structures & Algorithms
Object-Oriented Programming
Web Technologies
Database Management Systems

SKILLS

LANGUAGES
JavaScript
FRONTEND & DESIGN
React (React 19)
HTML5 / CSS3
Vite
Responsive UI / Glassmorphism
BACKEND
Node.js
Express.js
Flask
REST APIs
PostgreSQL
SQL
Pandas
TOOLS & PLATFORMS
Git / GitHub
Vercel / Netlify
ESLint
Selenium

CERTIFICATIONS

Database Management System
MongoDB Basics

SUMMARY

Final-year B.Sc. Computer Science student focused on frontend development and React architecture. Experienced in building interactive UIs, managing state synchronization across views, implementing full CRUD workflows, and deploying production-ready applications with clean component design.

EXPERIENCE

CYBERNAUT EDTECH PVT. LTD. | Project Intern
Nov 2025 -- Feb 2026 | Karur, Tamil Nadu (Remote)

- Assisted in developing frontend web components and interactive user interface modules during a 4-month internship.
- Collaborated with senior developers to test, debug, and optimize client-side applications for responsiveness and performance.

PROJECTS

NIVORA -- GROUNDWATER INTELLIGENCE PLATFORM | React, Flask, Pandas, PostgreSQL, Leaflet | Live Demo
2026

- Built a groundwater monitoring platform using real government datasets from data.gov.in and India-WRIS, processing water-level records across 1,400+ monitoring stations.
- Implemented a statistical anomaly detection pipeline using Z-score analysis and moving averages with Flask and Pandas to identify unusual fluctuations.
- Developed an interactive React + Leaflet geospatial dashboard to visualize monitoring stations with automated email alerts.

FLOWBOARD -- MULTI-VIEW KANBAN TRACKER | React 19, Vite, Vercel | Live Demo
2026

- Designed and developed a multi-view task management tool featuring Board, List, and Calendar views synchronized from a single shared state architecture.
- Implemented complete CRUD functionality with structured task metadata using custom modal and form components.
- Componentized layout into isolated renders (Board → Column → Card) to maintain scalable state flow and minimize redundant re-renders.

STUDYFLOW -- PERSONAL STUDY DASHBOARD | HTML5, CSS3, Vanilla JavaScript
2026

- Built a 5-page study dashboard (Dashboard, Focus Timer, Task Manager, Subjects, and Analytics) using modular vanilla Web APIs without external frameworks.
- Programmed a custom Pomodoro focus timer with precise session tracking per subject using standard execution timers.
- Engineered standard-compliant CSS visualization elements including custom subject heatmaps and peak activity charts.
